

PZN-plus

Pneumatic • 3-Finger Centric Gripper • Universal Gripper

Sizes
40 ... 300

Weight
0.13 kg ... 46 kg

Gripping force
255 N ... 35500 N

Stroke per finger
2 mm ... 35 mm

Workpiece weight
1.3 kg ... 127.5 kg

Application example

Insertion tool for assembling small to medium-sized axles. Thanks to the rotary feed-through, the axles can be turned several times to an unlimited extent ($> 360^\circ$). Slip ring contacts integrated in the rotary feed-through reliably supply the gripper with power.

- 1 3-Finger Centric Gripper PZN-plus
- 2 Rotary feed-through DDF

Universal Gripper

universal Concentric Gripper with high gripping force and maximum moments thanks to multi-tooth guidance

Field of application

Multi-purpose thanks to the diverse range of accessories. Can also be used in fields of application with special requirements to the gripper (temperature, chemical resistance, dirt, and many more).

Your advantages and benefits

Robust multi-tooth guidance

for precise handling

High maximum moments possible

suitable for using long gripper fingers

Wedge-hook design

for high power transmission and synchronized gripping

Air supply via hose-free direct connection or screw connections

for the flexible supply of compressed air in all automation systems

Comprehensive sensor accessory program

for versatile interrogation possibilities and control of stroke position

Manifold options

for perfect adaption to your case of application (dust protection, high temperature, anti-corrosion and many more)

General note to the series

Principle of function

Wedge-hook kinematics

Housing material

Aluminum alloy, hard-anodized

Base jaw material

Steel

Actuation

pneumatic, with filtered compressed air (10 microns): dry, lubricated or non-lubricated

Pressure medium: Required quality class of compressed air according to

DIN ISO 8573-1: 6 4 4

Warranty

36 months (details, general terms and conditions and operation manuals can be downloaded under www.schunk.com)

Scope of delivery

Brackets for proximity switches, centering sleeves, O-rings for direct connection, assembly and operating manual with manufacturer's declaration

Sectional diagram

- 1 Housing**
weight-optimized through application of hard-anodized, high-strength aluminum alloy
- 2 Wedge-hook design**
for high power transmission and centric gripping
- 3 Sensor system**
Brackets for proximity switches and adjustable control cams in the housing
- 4 Multiple-tooth guidance**
precise gripping through base jaw guidance with a high load capacity and a minimum play

Functional description

The piston is moved up and down by compressed air. Through its angled active surfaces, the wedge hook transforms this movement into the lateral, synchronous gripping movement of both base jaws.

Options and special information

Dust-protection version

Absolutely sealed, increased degree of protection against the ingress of materials, for use in dusty environments

Anti-corrosion version

for use in corrosion-inducing atmospheres

High-temperature version

for use in hot environments

Force intensified version

if higher gripping forces are required

Accessories

Accessories from SCHUNK – the suitable supplement for maximum functionality, reliability and performance of all automation modules.

Sensor system

Fittings

Universal intermediate jaw

Compensation unit

Protection cover

Quick-change Jaw System

Pressure maintenance valve

Finger blanks

Force measuring jaws

Analog position sensor

Flexible Position Sensor

Sensor cables

Sensor Distributor

① For the exact size of the required accessories, availability of this size and the designation and ID, please refer to the additional views at the end of the size in question. You will find more detailed information on our accessory range in the "Accessories" catalog section.

General note to the series

Gripping force

is the arithmetic total of the gripping force applied to each finger at distance P (see illustration) measured from the upper edge of the gripper.

Finger length

The finger length is measured from the upper edge of the gripper housing in the direction of the main axis.

Repeat accuracy

is defined as the spread of the limit position after 100 consecutive strokes.

Workpiece weight

The recommended workpiece weight is calculated for a force-type connection with a coefficient of friction of 0.1 and a safety factor of 2 against slippage of the workpiece on acceleration due to gravity g. Considerably heavier workpiece weights are permitted with form-fit gripping.

Closing and opening times

Closing and opening times are purely the times that the base jaws or fingers are in motion. Valve switching times, hose filling times or PLC reaction times are not included in the above times and must be taken into consideration when determining cycle times.

PZN-plus 240

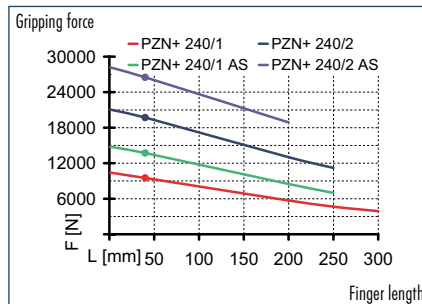

Pneumatic • 3-Finger Centric Gripper • Universal Gripper

Gripping force, I.D. gripping

Gripping force, O.D. gripping

Finger load

① The indicated moments and forces are static values, apply per base jaw and may occur simultaneously. M_y may arise in addition to the moment generated by the gripping force itself. If the max. permitted finger weight is exceeded, it is imperative to throttle the air pressure so that the jaw movement occurs without any hitting or bouncing. Service life may be reduced.

Main view

The drawing shows the gripper in the basic version with closed jaws, the dimensions do not include the options described below.

① The SDV-P pressure maintenance valve can also be used for I.D. or O.D. gripping alternatively or in addition to the spring-loaded, mechanical gripping force maintenance device (see "Accessories" catalog section).

- A, a Main/direct connection, gripper opening
- B, b Main/direct connection, gripper closing
- S Air purge connection
- ① Gripper connection
- ② Finger connection

- ⑥ Lubricating nipple connection
- ②④ Bolt circle
- ⑧⑩ Depth of the centering sleeve hole in the matching part

Hose-free direct connection

- ③ Adapter
- ④ Gripper

The direct connection is used for supplying compressed air without hoses. Instead, the pressure medium is fed through bore-holes in the mounting plate.

AS/IS gripping force maintenance device

The mechanical gripping force maintenance device ensures a minimum gripping force even in case of pressure drop. This acts as closing force in the AS version, and as opening force in the IS version. In addition, the gripping force maintenance device can also be used for increasing the gripping force or for single-acting gripping.

PZN-plus 240

Pneumatic • 3-Finger Centric Gripper • Universal Gripper

Dust-protection version

- ⑨ For mounting screw connection diagram, see basic version
 ⑮ Sealing bolt
 ⑳ For AS / IS version

The "dust-protection" option increases the degree of protection against penetrating substances. The screw connection diagram shifts by the height of the intermediate jaw. The finger length is still measured from the upper edge of the gripper housing.

Precision version

- ⑳ For AS / IS version

The indicated tolerances just refer to the types of precision versions shown in the chart of technical specifications. All other types of precision versions are available on request.

Spring-loaded pressure piece

For spring-supported positioning of the workpiece against a stop after the gripper has opened. Especially developed for loading machines.

Description	ID	Stroke	Min. force
Spring-loaded pressure piece			
A-PZN-plus/DPZ-plus 240	0303726	7.5 mm	240 N

- ① The pressure piece cannot be combined with the dust-protection version. Please contact us if you require a special pressure piece.

Force measuring jaws

- ① Gripper connection
 ② Finger connection
 ①⑦ Cable outlet
 ⑦⑦ Active intermediate jaws
 ⑦⑧ Passive intermediate jaws

Force measuring jaws measure gripping forces, but can also determine workpiece weights or dimensional deviations. There are active and passive intermediate jaws (FMS-ZBA or FMS-ZBP). At least one active force measuring jaw is required per gripper, the rest can be passive. For each active jaw, a FMS-A1 control unit and a FMS-A connection cable are required.

Description	ID
Active intermediate jaws	
FMS-ZBA 240	0301844
Passive intermediate jaws	
FMS-ZBP 240	0301845
