# THE MXB BELT DRIVEN ELECTRIC ACTUATOR - DESIGNED TO OUTLAST EVERY BELT DRIVEN ACTUATOR ON THE MARKET

expect number one rodless supplier. Designed with our exclusive **ENDURANCE TECHNOLOGY™** features, the MX delivers superior performance to meet the most demanding applications. Nobody knows rodless like Tolomatic, and the MX proves it.

- MXB-**P**: High precision bearings feature smooth, low breakaway motion
- MXB-**P**: Durable profiled rail design uses THK® Caged Ball® technology to reduce friction and extend actuator life.
- MXB-**P**: High load and bending moment capacities

# MXB Belt Driven Actuator

## ADVANTAGES OF BELT SOLUTIONS

The use of synchronous belts, often referred to as timing belts, have become a standard in the automated motion industry as an alternate to screw drive mechanisms for producing linear motion. MXB-**U** and MXB-**P** belt driven actuators are an excellent solution for applications that require:

- High-speed linear velocities
- High acceleration rates
- Long length strokes
- Excellent repeatability
- High duty cycles

Tolomatic belt driven actuators can achieve linear acceleration up to 1200 in/sec<sup>2</sup>.

MXB-U velocity of up to 200 in/sec (5 m/sec),

MXB-P velocity of up to 150 in/sec (3.8 m/sec)

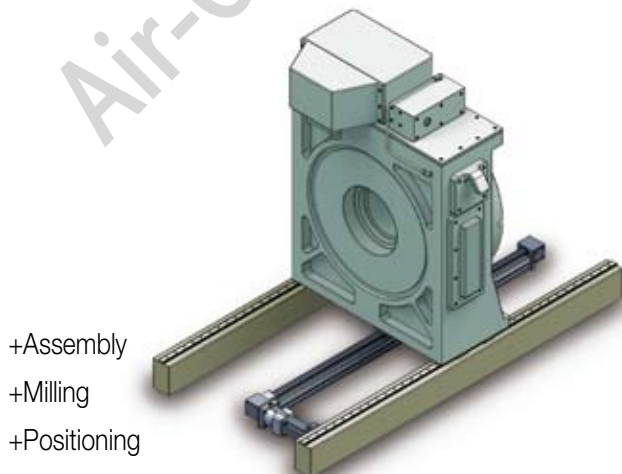

## BELT DRIVEN APPLICATIONS

Tolomatic MXB-**U** and MXB-**P** belt driven actuators are:

- Easy to size, design and order
- Quick to install and maintain
- Simple to integrate and control
- Provide lower installed cost

Both MXB-U and MXB-P are available in multiple frame sizes. The MXB-P belt driven actuator integrates the advantages of a linear belt solution with a load support and guidance system. This combination allows you to install a pre-assembled and compact solution, often without the need of external guide rails or load support systems. MXB-P offers options such as dual carriers for twice the load and moment capacity.

### **U** APPLICATION: Workcenter Positioning

- +Assembly
- +Milling
- +Positioning

## BELT CONSTRUCTION

Tolomatic's standard belt is a polyurethane material reinforced with steel tension members to produce high carrier thrusts without belt stretch.

Tolomatic uses an HTD synchronous belt that features a curvilinear tooth profile. The HTD tooth profile distributes tooth load more evenly and provides greater tooth shear strength, allowing for higher thrust loading.

The deep teeth of the HTD profile are cogging-resistant, preventing potentially damaging positioning errors.

*Tolomatic's belt tooth profile distributes thrust force evenly*

### **P** APPLICATION: High Speed Flying Cut Off

- +Test stations
- +Product handling
- +Camera positioning

### **P** APPLICATION: X-Y Multi-Axis

- +Laser marking
- +Material cutting
- +Adhesive dispensing

# MXB-**U** BELT DRIVE (UNGUIDED)

**ENDURANCE TECHNOLOGY**<sup>SM</sup>

Endurance Technology<sup>SM</sup> features are designed for maximum durability to provide extended service life.

## • MOTOR ORIENTATION •

### YOU CAN CHOOSE:

- Direct drive option directly couples motor to the drive shaft; one-piece housing construction for optimum alignment and support of the motor
- Reduction option in 3:1 reduction (2:1 on MXB16)

## • INCH OR METRIC MOUNTING •

- Your choice of blank, inch (US standard) or metric mounting to the plate

## • YOUR MOTOR HERE •

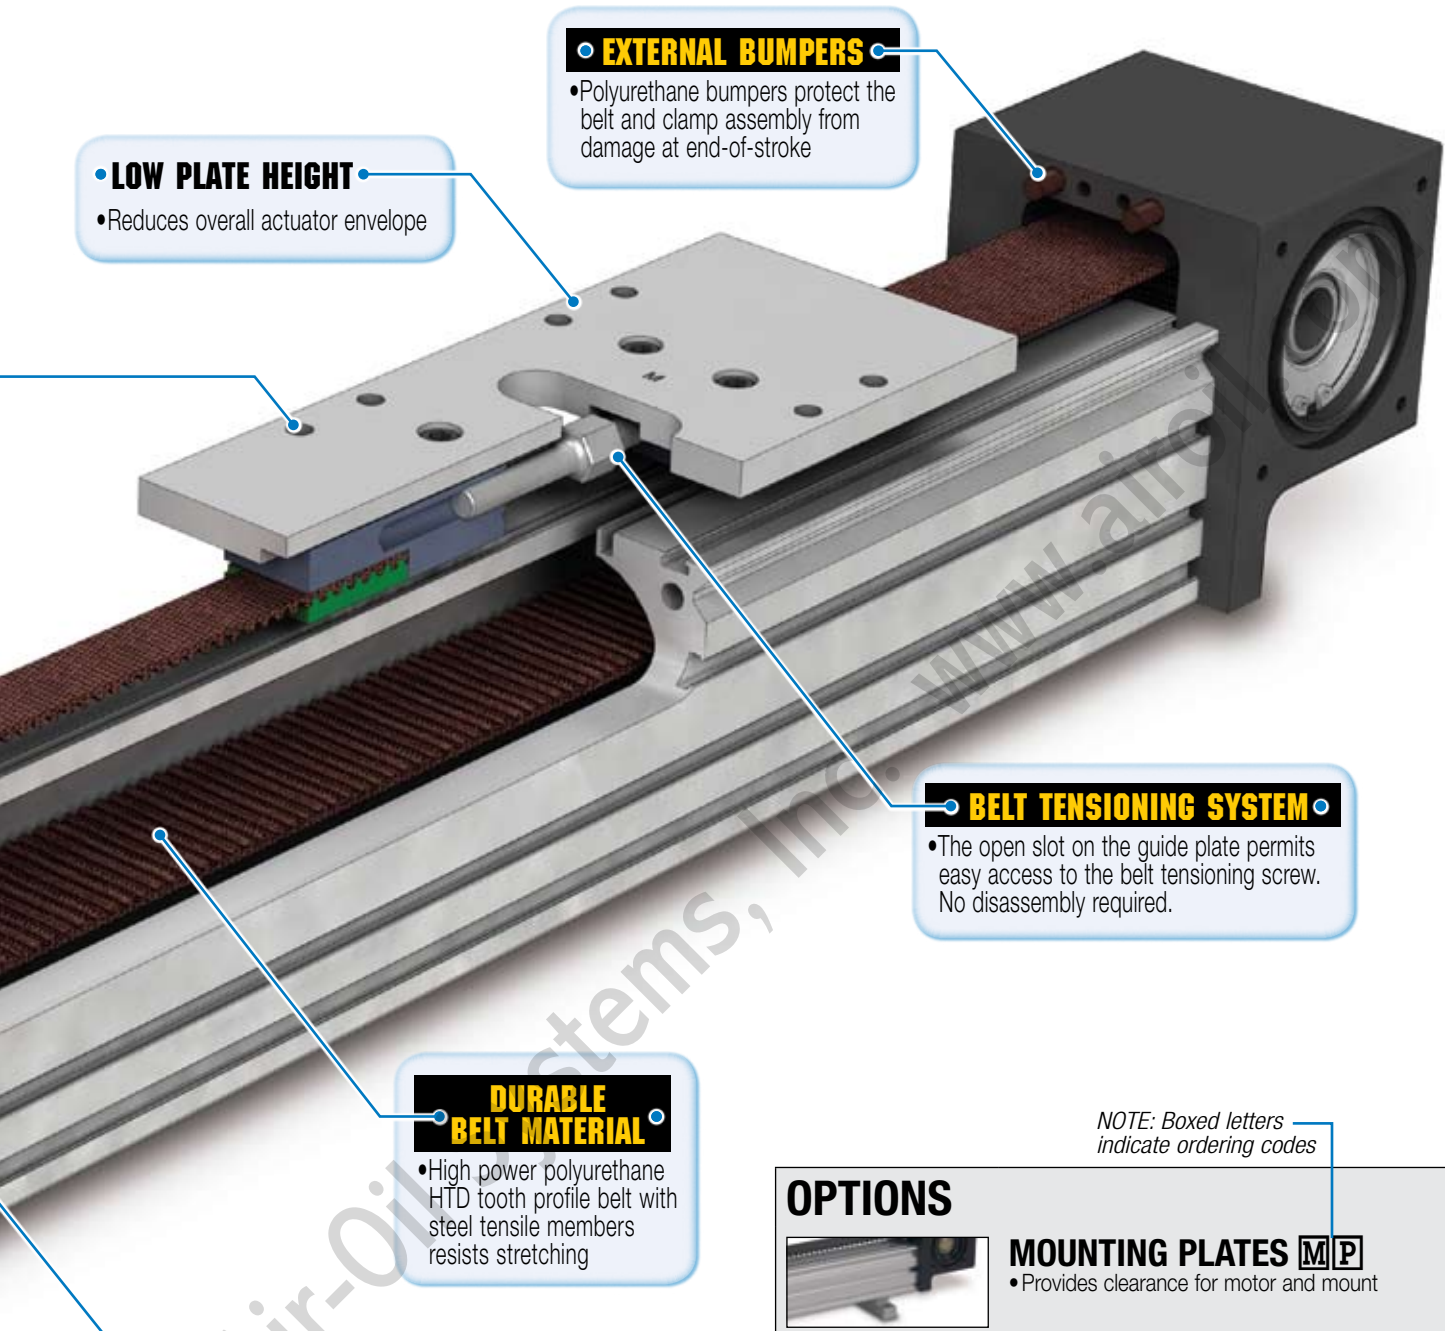

### YOU CAN CHOOSE:

- Motor or gearbox supplied and installed by Tolomatic
- Specify the device to be installed and actuator ships with proper mounting hardware - MXB is a "Your Motor Here" actuator for easy direct drive motor installation. Check our website ([www.tolomatic.com/y mh](http://www.tolomatic.com/y mh)) for complete information
- Specify and ship your device to Tolomatic for factory installation

## • OVERSIZED PULLEY BEARINGS •

- Drive shaft assembly incorporates oversized shielded/sealed ball bearings for long life and high speeds

**5 DAYS**  
**BUILT-TO-ORDER**

**• LOW PLATE HEIGHT •**  
• Reduces overall actuator envelope

**• EXTERNAL BUMPERS •**  
• Polyurethane bumpers protect the belt and clamp assembly from damage at end-of-stroke

**• BELT TENSIONING SYSTEM •**  
• The open slot on the guide plate permits easy access to the belt tensioning screw. No disassembly required.

**• DURABLE BELT MATERIAL •**  
• High power polyurethane HTD tooth profile belt with steel tensile members resists stretching

**• LIGHTWEIGHT ALUMINUM DESIGN •**  
• Clear anodized extrusion design is optimized for rigidity and strength

NOTE: Boxed letters indicate ordering codes

**OPTIONS**

	<b>MOUNTING PLATES <span style="border: 1px solid black; padding: 0 2px;">M</span><span style="border: 1px solid black; padding: 0 2px;">P</span></b> • Provides clearance for motor and mount
	<b>HEAD COVER PLATE <span style="border: 1px solid black; padding: 0 2px;">H</span><span style="border: 1px solid black; padding: 0 2px;">C</span><span style="border: 1px solid black; padding: 0 2px;">P</span></b> • Provides protection for pulley and bearing
	<b>TUBE CLAMPS <span style="border: 1px solid black; padding: 0 2px;">T</span><span style="border: 1px solid black; padding: 0 2px;">C</span></b> • Used for intermediate support • Flush with bottom of actuator to retain low profile • Drop-in, adjustable mounting locations (MXB16U uses mounting plates)

# MXB-**P** BELT DRIVE (PROFILED RAIL)

## ● ENDURANCE TECHNOLOGY<sup>SM</sup> ●

Endurance Technology<sup>SM</sup> features are designed for maximum durability to provide extended service life.

### ● CAGED BALL<sup>®</sup> BEARINGS ●

- THK<sup>®</sup> Caged Ball<sup>®</sup> bearings are used to reduce friction and extend actuator life
- Caged Ball<sup>®</sup> technology creates a grease pocket between ball elements, reducing friction, noise and maintenance
- Large permissible moment loads
- High speed operation, low heat generation
- High precision, smooth, low friction motion

### ● DURABLE BELT MATERIAL ●

- High power polyurethane HTD tooth profile belt with steel tensile members resists stretching

### ● OVERSIZED PULLEY BEARINGS ●

- Drive shaft assembly incorporates oversized shielded/sealed ball bearings for long life and high speeds

### ● INCH OR METRIC MOUNTING ●

- Your choice of inch (US standard) or metric mounting to the carrier

### ● MOTOR ORIENTATION ●

#### YOU CAN CHOOSE:

- Direct drive option directly couples motor to the drive shaft; one-piece housing construction for optimum alignment and support of the motor
- Reduction option in 3:1 reduction (2:1 on MXB16)

### ● YOUR MOTOR HERE ●

#### YOU CAN CHOOSE:

- Motor or gearbox supplied and installed by Tolomatic
- Specify the device to be installed and actuator ships with proper mounting hardware - MXB is a "Your Motor Here" actuator for easy direct drive motor installation. Check our website ([www.tolomatic.com/ymh](http://www.tolomatic.com/ymh)) for complete information
- Specify and ship your device to Tolomatic for factory installation

**BELT TENSIONING SYSTEM**

- The open slot on the carrier side permits easy access to the belt tensioning screw. No disassembly required and no need to remove the load from the carrier

**LOW CARRIER HEIGHT**

- Reduces overall actuator envelope
- Large mounting pattern for excellent load stability

**EXTERNAL BUMPERS**

- Polyurethane bumpers protect the belt and clamp assembly from damage at end-of-stroke

**LIGHTWEIGHT ALUMINUM DESIGN**

- Clear anodized extrusion design is optimized for rigidity and strength

*NOTE: Boxed letters indicate ordering codes*

**OPTIONS**

	<b>AUXILIARY CARRIER</b> <b>D</b> <b>C</b>
	<b>MOUNTING PLATES</b> <b>M</b> <b>P</b>
	<b>HEAD COVER PLATE</b> <b>H</b> <b>C</b> <b>P</b>
	<b>SWITCHES</b>

- 2X higher Fz & Fy (load) capacity
- High bending moment capacity
- Provides clearance for motor and mount
- Provides actuator support
- Provides protection for pulley and bearing
- Wide variety of sensing choices: Reed, Solid State PNP or NPN, available normally open or normally closed
- Flush mount, drop-in installation
- Bright LEDs, power & signal indication
- CE rated, RoHS compliant

**MAXIMUM VELOCITY**  $\square$  200 in/sec 5080 mm/sec

**MAXIMUM VELOCITY**  $\square$  150 in/sec 3810 mm/sec

**MAXIMUM ACCELERATION** 1200 in/sec<sup>2</sup> 30.48 m/sec<sup>2</sup>

**REPEATABILITY** ± 0.002 in ± 0.513 mm

**TEMPERATURE RANGE** 10 to 130 °F -12 to 54 °C

**⚠** Heat generated by the motor and drive should be taken into consideration as well as linear velocity and work cycle time. For applications that require operation outside of the recommended temperature range, contact the factory.

**STRAIGHTNESS, FLATNESS** 0.00067 L in 0.01702 L mm

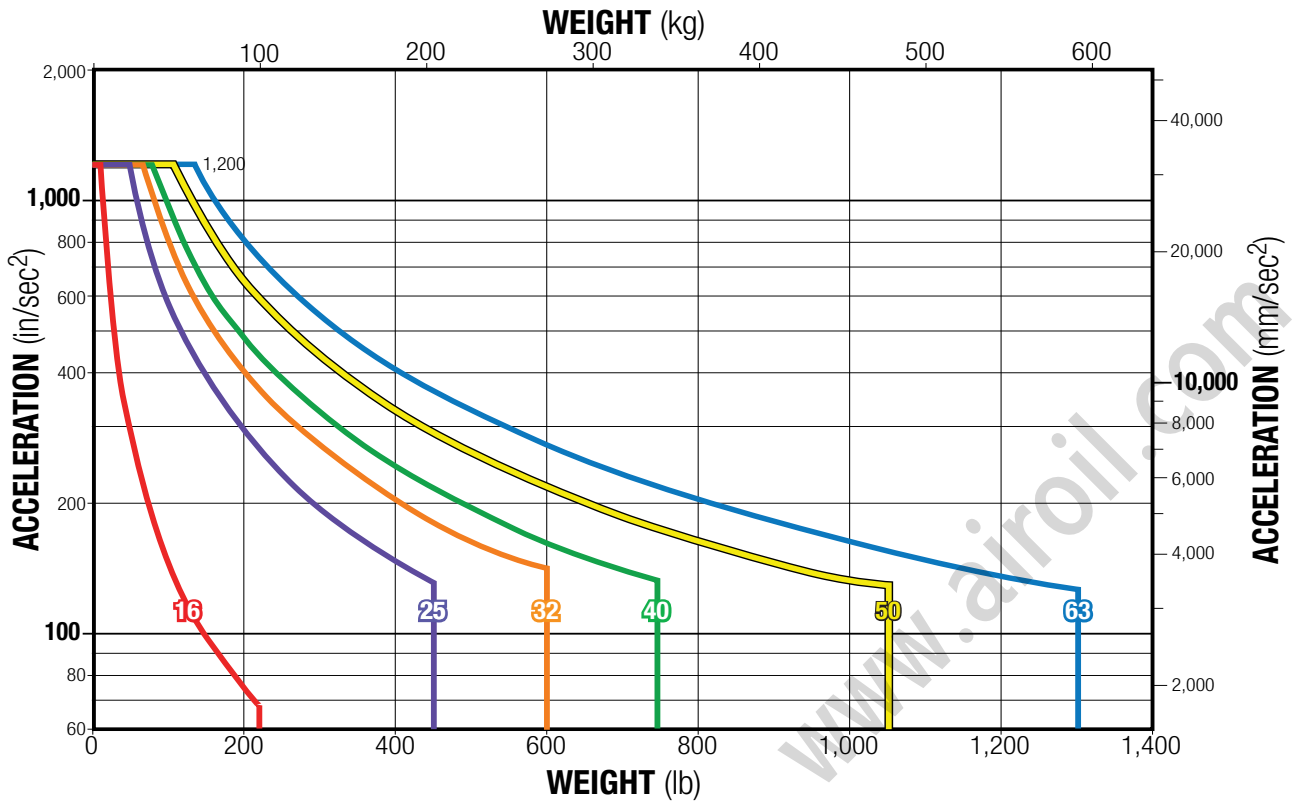

Actuator mounted on a flat surface and fully restrained (see Mounting Plate Requirements, page 9) L = Maximum distance between supports

**⚠** The listed values relating to straightness/flatness are intended for reference purposes only, and not as an engineering standard of absolute tolerance for a given actuator. Appropriate installation is the single most important factor in reducing variation, so good engineering practices such as measurement, mapping, etc. must be employed in applications with stringent straightness/flatness requirements.

\*At minimum "D" distance see below for complete information

### SPEED FACTOR

FOR APPLICATIONS WITH HIGH SPEED OR SIGNIFICANT SHOCK AND VIBRATION: Calculated values of loads and bending moments must be increased by speed factor from the graph below to obtain full rated life of profiled rail bearing system.

Proper lubrication of profiled rail bearing system is essential for normal operation and achievement of full rated life of MX--P actuators. Lubrication should be performed at intervals of 4,000,000 inches of travel or once every year, whichever occurs first. However, operating conditions such as high speed or significant shock and vibration may require more frequent lubrication. Please consult Tolomatic for recommendations.

#### Recommended grease types:

1. Refined mineral oil-based multi-purpose grease with lithium thickening agent.
2. High-grade synthetic oil-based grease with urea thickening agent.

### AUXILIARY CARRIER BENDING MOMENTS WITH INCREASED "D" DISTANCE BETWEEN CARRIERS

Ratings were calculated assuming the following conditions:

- 1.) Coupling between carriers is rigid.
- 2.) Load is equally distributed between carriers.
- 3.) Coupling device applies no misalignment loads to carriers.

⚠ The above ratings are the maximum values for shock-free, vibration-free operation in a typical industrial environment, which must not be exceeded even in dynamic operation. Contact Tolomatic for assistance in selecting the most appropriate actuator for your application.

# MXB-P Belt Driven Actuator

## LOAD DEFLECTION

### DEFLECTION ABOUT X AXIS

RODLESS ACTUATORS

### DEFLECTION ABOUT Y AXIS

ROD STYLE ACTUATORS

### DEFLECTION ABOUT Z AXIS

CONTROL SYSTEMS +

#### DEFLECTION TESTING WAS DONE UNDER THESE CRITERIA:

- 1.) Actuator was properly mounted with distance between mounting plates within recommendations (see Mounting Plate Requirements page 9)
- 2.) Deflection was measured at 12" from center of carrier as shown

The moment and load capacity of the actuator bearing system is based on an L10 life of 200,000,000 linear inches of travel. Life of the actuator will vary for each application depending on the combined loads, motion parameters and operating conditions. The load factor ( $L_f$ ) ratios for each application must not exceed a value of 1, as calculated below. Exceeding a load factor of 1 will diminish the actuator rated life.

$$L_f = \frac{M_x}{M_{x_{max}}} + \frac{M_y}{M_{y_{max}}} + \frac{M_z}{M_{z_{max}}} + \frac{F_y}{F_{y_{max}}} + \frac{F_z}{F_{z_{max}}} \leq 1$$

With combined loads,  $L_f$  must not exceed the value 1.

# MXB-U Belt Driven Actuator

## ACTUATOR & OPTION DIMENSIONS

**A** \*In order for the actuator to operate properly, dimensions "G" and "U" must not vary more than  $\pm 0.020$  in [0.51mm] over the entire length of the stroke.

### MOTOR MOUNTING

The MXB-**P** is unique among Tolomatic belt driven actuators. The mounting surface of the carrier is located 90° from the motion of the belt. The side opposite the belt is reserved for switch placement. The bottom of the actuator is reserved for mounting. If the motor is mounted in the SDT (direct drive top orientation), be sure the load mounted to the carrier does not interfere with the motor.

LARGE FRAME MOTORS AND SMALLER SIZE ACTUATORS: Cantilevered motors need to be supported if subjected to continuous rapid reversing duty and/or under dynamic conditions.

RODLESS ACTUATORS

ROD STYLE ACTUATORS

CONTROL SYSTEMS +

# MXB-P Belt Driven Actuator

## SWITCHES SPECIFICATIONS

**NOTE:** Switches NOT available for MXB-**U**

MX products offer a wide range of sensing choices. There are 12 switch choices: reed, solid state PNP (sourcing) or solid state NPN (sinking); in normally open or normally closed; with flying leads or quick-disconnect.

Commonly used for end-of-stroke positioning, these switches allow drop-in installation anywhere along the entire actuator length. The one-piece design includes the retained fastening hardware and is designed for the slot opposite the belt on the MXB (upper slot on 40, 50, 63 sizes). The magnet is located in a slot on the carrier. See the dimensional drawings on the next page for details of magnet and switch locations. Switches and magnets can be installed in the field at any time.

Switches are used to send digital signals to PLC (programmable logic controller), TTL, CMOS circuit or other controller device. Switches contain reverse polarity protection. Solid state QD cables are shielded; shield should be terminated at flying lead end.

All switches are CE rated and are RoHS compliant. Switches feature bright red or yellow LED signal indicators; solid state switches also have green LED power indicators.

	Order Code	Part Number	Lead	Switching Logic	Power LED	Signal LED	Operating Voltage	**Power Rating (Watts)	Switching Current (mA max.)	Current Consumption	Voltage Drop	Leakage Current	Temp. Range	Shock / Vibration

	<b>P K</b>	8100-9093	QD*											
	<b>H Y</b>	8100-9094	5m	NPN (Sinking) Normally Closed	Green	Red								
	<b>H K</b>	8100-9095	QD*											

\*QD = Quick-disconnect Enclosure classification IEC 529 IP67 (NEMA 6)

CABLES: Robotic grade, oil resistant polyurethane jacket, PVC insulation

**WARNING:** Do not exceed power rating (Watt = Voltage x Amperage). Permanent damage to sensor will occur.

## SWITCH INSTALLATION AND REPLACEMENT

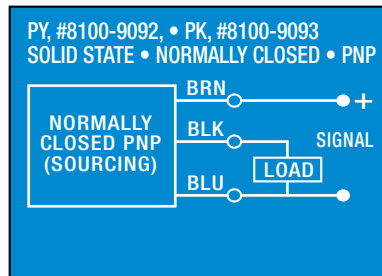

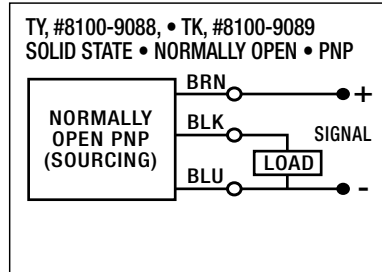

Place switch in side groove on tube at desired location with "Tolomatic" facing outward. While applying light pressure to the switch, rotate the switch halfway into the groove. Maintaining light pressure, rotate the switch in the opposite direction until it is fully inside the groove with "Tolomatic" visible. Re-position the switch to the exact location and lock the switch securely into place by tightening the screw on the switch.

**USE THE TOLOMATIC SIZING AND SELECTION SOFTWARE AVAILABLE ON-LINE AT [www.tolomatic.com](http://www.tolomatic.com) OR... CALL TOLOMATIC AT 1-800-328-2174.** We will provide any assistance needed to determine the proper MX actuator for the job.

FAX 1-763-478-8080

EMAIL [help@tolomatic.com](mailto:help@tolomatic.com)

# SELECTION GUIDELINES

The process of selecting a belt driven actuator for a given application can be complex. **It is highly recommended that you contact Tolomatic or a Tolomatic distributor for assistance in selecting the best actuator for your application.** The following overview of the selection guidelines are for educational purposes only.

## 1 CHOOSE ACTUATOR SIZE

Choose an actuator that has the thrust, speed and moment load capacity to move the load.

**A)** Use the Maximum Thrust table (below) for the thrust.

**B)** Speed of MXB-U 200 in/sec (5 m/sec); Speed of MXB-P 150 in/sec (3.81 m/sec)

**C)** MXB-P Moment and Load Capacity tables (page 10) for the actuator.

SIZE	MAXIMUM THRUST	
	lbf	N
16	38	169
25	151	672
32	209	930
40	250	1112
50	325	1446
63	418	1859

## 2 COMPARE LOAD TO MAXIMUM LOAD CAPACITIES

Calculate the application load (combination of load mass and forces applied to the carrier) and application bending moments (sum of all moments  $M_x$ ,  $M_y$ , and  $M_z$  applied to the carrier). Be sure to evaluate the magnitude of dynamic inertia moments. When a rigidly attached load mass is accelerated or decelerated, its inertia induces bending moments on the carrier. Careful attention to how the load is decelerated at the end of the stroke is required for improved actuator performance and application safety. If either load or any of the moments exceed figures indicated in the Moment and Load Capacity tables (page 10) for the actuator consider:

- 1) A larger actuator size
- 2) Auxiliary carrier
- 3) External guide system (if the load is externally supported and guided, consider using MXB-U)

## 3 CALCULATE LOAD FACTOR (LF)

For loads with a center of gravity offset from the carrier account for both applied (static) and dynamic loads. The load factor (LF) must not exceed the value of 1.

$$L_f = \frac{M_x}{M_{x_{max}}} + \frac{M_y}{M_{y_{max}}} + \frac{M_z}{M_{z_{max}}} + \frac{F_y}{F_{y_{max}}} + \frac{F_z}{F_{z_{max}}} \leq 1$$

If  $L_f$  does exceed the value of 1, consider the three choices listed in step #2.

## 4 ESTABLISH YOUR MOTION PROFILE AND CALCULATE ACCELERATION RATE

Using the application stroke length and maximum carrier velocity (or time to complete the linear motion), establish the motion profile. Select either triangular (accel-decel) or trapezoidal (accel-constant speed-decel) profile. Now calculate the maximum acceleration and deceleration rates of the move. Acceleration/deceleration should not exceed  $1200 \text{ in/sec}^2$  ( $30.48 \text{ m/sec}^2$ ). Also, do not exceed safe rates of dynamic inertia moments determined in step #3.

## 5 SELECT MOTOR (GEARHEAD IF NECESSARY) AND DRIVE

To help select a motor and drive, use the sizing equations located in the Engineering Resources section of the Tolomatic Electric Products Catalog (#3600-4609) to calculate the application thrust and torque requirements. Refer to Motor sections to determine the motor and drive.

## 6 DETERMINE MOUNTING PLATE REQUIREMENTS

- Consult the Mounting Plate Requirements graph for the model selected (page 9)
- Cross reference the application load and maximum distance between supports
- Select the appropriate number of mounting plates

## 7 CONSIDER OPTIONS

- Choose metric or inch (U.S. standard) load mounting. When ordering use **SIK** for inch and **SIM** for metric.
- Switches - Reed, Solid State PNP or NPN, all available normally open or normally closed

### SPEED FACTOR

FOR APPLICATIONS WITH HIGH SPEED OR SIGNIFICANT SHOCK AND VIBRATION: Calculated values of loads and bending moments must be increased by speed factor from the graph below to obtain full rated life of profiled rail bearing system.

# ADD YOUR MOTION CONTROL SYSTEM TO THE MXB or

## MRS STEPPER SYSTEM

### STEPPER DRIVE AND CONTROLLER

The **DS** [STAC6-S] & **SI** [STAC6-Si] represent the latest developments in stepper drive technology, incorporating features that derive the highest performance from today's stepper motors. Anti-resonance and waveform damping control algorithms provide excellent performance.

- Current Output 0.5 to 6.0 A
- 90-135 VAC Input
- 167V Bus
- Set-up and configuration software
- Configurable idle current reduction
- External control options
- Pulse and direction
- Analog command signal
- Host command via RS232/485
- Integral control options -

**Si Programmer™ - intuitive easy-to-use graphical programming language**

#### LATEST IN MICROSTEPPING TECHNOLOGY

- **ANTI-RESONANCE**  
Achieves higher speeds and better torque utilization
- **COMMAND SIGNAL SMOOTHING**  
Softens effect of changes in velocity and direction
- **MICROSTEP EMULATION**  
Smooth, high resolution motion across range of speeds
- **SELF TEST**  
Measure motor parameters automatically to optimize system performance
- **TORQUE RIPPLE SMOOTHING**  
Adjusts current waveform to reduce low speed torque ripple, providing smoother motion at low speeds

**⚠ Please note the Tolomatic ordering codes. Use these codes when ordering stepper components from Tolomatic**  
(Applied Motion Products model equivalents appear in [brackets])

## STEPPER ACCESSORIES

### **HUB** MULTI-AXIS MOTION HUB WITH I/O

- Networks Stepper products for multi-axis motion applications

### **MMI** OPERATOR INTERFACE

- Allows visual setup of the panel to show a particular action taking place, or to prompt the user to make a decision or provide information such as move distance, move speed, repeat count

### **BOB** BREAK OUT BOARD

- Connects the I/O points of the **DS** [STAC6-S] & **SI** [STAC6-Si]

## STEPPER MOTORS

NEMA 23-Frame and 34-Frame MRS Stepper Motors

- Speeds up to 3,000 RPM
- High resolution (up to 51,200 steps per rev)
- Holding torque to 1845 oz-in (13.03 Nm)
- 2000 line quadrature encoder option
- 10 ft. power cables with connector pre-wired

#### HYBRID MOTOR DESIGN

- Designed for increased torque and acceleration rates over a wider speed range

#### INDUSTRY STANDARD MOUNTING

- Standard NEMA frame sizes (23 and 34)

**COMPLETE INFORMATION:**  
[www.tolomatic.com](http://www.tolomatic.com)

# SELECT A COMPLETE SYSTEM FROM TOLOMATIC

## MRV SERVO SYSTEM

### DIGITAL SERVO DRIVE AND CONTROLLER

Designed by Tolomatic, the Axiom Plus PV combines the functions of a servo drive, motion controller and programmable logic controller in a single package. Our all-in-one design eliminates the confusion of multiple software packages, removes discrete wiring or network programming between controllers, and simplifies application programming.

The free Windows®-based software package programs the PLC functions in a standard ladder logic environment and the motion control functions in a simple graphical motion editor.

#### • INNOVATIVE SERVO TECHNOLOGY •

- **FLUX VECTOR CURRENT CONTROL**  
Provides closed loop motor control of torque producing current by sensing motor current in each individual motor phase. This gives a high bandwidth torque response over the full speed range with high efficiency and minimal phase lag
- **PLUGGABLE SCREW TERMINAL BLOCKS**  
Allows easier termination, quick connection or removal of wiring and direct access to signals for testing with a meter
- **MODBUS RTU COMMUNICATIONS**  
Standard Modbus RTU is built into the drive for communications to other controllers or operator interfaces
- **AMPLIFIER ONLY OPTION**  
The DV (drive only) version is for use with an external controller that provides analog velocity, analog torque or step commands

#### SPECIFICATIONS:

	PV10	PV20	PV30
Input Line	95 - 250 VAC, 1Ø or 3Ø		
Input Hz	47 - 63 Hz		
Output Current Peak ( $A_{peak}$ )	10	20	30
Output Current Cont ( $A_{cont}$ )	5	10	15
Output Power Cont (kW)	1.4	2.8	4.2
Discrete Inputs	15, optically isolated 5-25VDC		
Discrete Outputs	8, optically isolated 5-25VDC		
Analog Inputs	1, 14-bit Differential $\pm 10$ VDC		

## SERVO MOTORS

The MRV series of brushless servo motors is available in a wide range of torque outputs to meet your demanding applications. These motors are designed for precision motion profiles, low inertia, maximum power density and long continuous life.

#### SPECIFICATIONS:

	TORQUE		Max. Speed (RPM)	Rotor Inertia (lb-in <sup>2</sup> )
	Cont. (lb-in)	Peak (lb-in)		
MRV11	3	12	5000	0.02
MRV21	4	11	6000	0.05
MRV22	8	22	6000	0.10
MRV23	11	33	6000	0.14
MRV24	15	47	6000	0.19
MRV31	17	85	6000	0.38
MRV32	30	150	6000	0.69
MRV33	44	220	6000	1.00
MRV51	80	240	3000	2.53

#### • HIGH RESOLUTION ENCODER •

- 1000 line quadrature industry standard incremental encoder feedback

#### • INDUSTRY STANDARD MOUNTING •

- Standard NEMA frame sizes (17, 23, 34 and 56)

#### • INTEGRAL PROTECTION •

- Thermistor provides over temperature protection
- IP65 rated

**BELT MATERIAL AND WIDTH**

**BWS10** 10 mm Urethane Steel (MXB16)  
**BWS18** 18 mm Urethane Steel (MXB25)  
**BWS25** 25 mm Urethane Steel (MXB32)  
**BWS30** 30 mm Urethane Steel (MXB40)  
**BWS40** 40 mm Urethane Steel (MXB50)  
**BWS50** 50 mm Urethane Steel (MXB63)

**STROKE LENGTH & MOUNTING TYPE**

**SK** \_\_\_\_\_ Stroke, enter desired stroke length in **inches**

**SM** \_\_\_\_\_ Stroke, enter desired stroke length in **millimeters**

**GPB** Blank Plate (MXB-U only)  
NO MOUNTING HOLES allowing user to drill and tap as needed

**NOTE: Actuator mounting threads and mounting fasteners will be either inch or metric, depending on how stroke length is indicated**

**SK=inch mounting**  
**SM= metric mounting**

**MOTOR MOUNTING / REDUCTION**  
(must choose one)

**SDL, SDLD\*** Direct Drive on Left  
**SDR, SDRD\*** Direct Drive on Right

**▲ A motor size and code must be selected when specifying a 3:1 reduction. Reference the motor ordering pages in Electric Products Catalog #3600-4609.**

**SDTL, SDTLD\*** 3:1 Reduction on Top Left  
**SDTR, SDTRD\*** 3:1 Reduction on Top Right  
**SDBL, SDBLD\*** 3:1 Reduction on Left Bottom  
**SDRB, SDRBD\*** 3:1 Reduction on Right Bottom  
**\*For Dual Stub Shaft Option**

**MOTOR MOUNTING / REDUCTION**  
(must choose one)

**SDT, SDTD\*** Direct Drive on Top  
**SDB, SDBD\*** Direct Drive on Bottom

**▲ A motor size and code must be selected when specifying a 3:1 reduction. Reference the motor ordering pages in Electric Products Catalog #3600-4609.**

**SDLT, SDLTD\*** 3:1 Reduction on Left Top  
**SDRT, SDRTD\*** 3:1 Reduction on Right Top  
**SDLB, SDLBD\*** 3:1 Reduction on Left Bottom  
**SDRB, SDRBD\*** 3:1 Reduction on Right Bottom  
**\*For Dual Stub Shaft Option**

**AUXILIARY CARRIER**

**DC** \_\_\_\_\_ Auxiliary Carrier, (MXB-P only) enter center-to-center spacing desired in **inches (SK)** or **millimeters (SM)**

(Same unit of measure as stroke length is required)

**▲ Center-to-center spacing between carriers adds to overall length of the actuator, this distance will not be subtracted from stroke length specified in the previous step**

**HEAD COVER PLATES**  
**HCP** Head Cover Plates

**MOUNTING**

**MP** Mounting Plates, & quantity  
**TC** Tube Clamps, & quantity ("U" bearing only)

**MOTOR / DRIVE / CONTROLLER / PLANETARY GEARBOX**

**▲ Reference the ordering pages in Electric Products Catalog #3600-4609 Stepper Products Brochure #3600-4160 & Planetary Gearbox Doc. #3600-4161**

**SWITCHES ("P" bearing only)**

**RY** Reed Switch (Normally Open) with 5-meter lead, & enter quantity desired

**RK** Reed Switch (Normally Open) with 5-meter lead/QD, & quantity

**NY** Reed Switch (Normally Closed) with 5-meter lead, & quantity

**NK** Reed Switch (Normally Closed) with 5-meter lead/QD, & quantity

**TY** Solid State Switch PNP (Normally Open) w/ 5-meter lead, & quantity

**TK** Solid State Switch PNP (Normally Open) w/ 5-meter lead/QD, & quantity

**KY** Solid State Switch NPN (Normally Open) w/ 5-meter lead, & quantity

**KK** Solid State Switch NPN (Normally Open) w/ 5-meter lead/QD, & quantity

**PY** Solid State Switch PNP (Normally Closed) w/ 5-meter lead, & quantity

**PK** Solid State Switch PNP (Normally Closed) w/ 5-meter lead/QD, & quantity

**HY** Solid State Switch NPN (Normally Closed) w/ 5-meter lead, & quantity

**HK** Solid State Switch NPN (Normally Closed) w/ 5-meter lead/QD, & quantity

FOR COMPLETE, UP-TO-DATE INFORMATION

**▲ Not all codes listed are compatible with all options.**

Call Tolomatic 1-800-328-2174 to determine available options and accessories based on your application requirements.

# THE TOLOMATIC DIFFERENCE What you expect from the industry leader:

## EXCELLENT CUSTOMER SERVICE & TECHNICAL SUPPORT

Our people make the difference! Expect prompt, courteous replies to all of your application and product questions.

## INDUSTRY LEADING DELIVERIES

Standard catalog products are built to order and ready-to-ship in 5 days or less. Modified and custom products ship weeks ahead of the competition.

## INNOVATIVE PRODUCTS

From standard catalog products... to modified products... to completely unique custom products, Tolomatic designs and builds the best solutions for your challenging applications.

## SIZING & SELECTION SOFTWARE

Windows® compatible, downloadable from our website – FREE – the best tool of its kind on the market! Product selection has never been easier.

## 3D MODELS & 2D DRAWINGS AVAILABLE ON THE WEB

Easy to access CAD files are available in many popular formats. Ê

### ALSO CONSIDER THESE OTHER TOLOMATIC PRODUCTS:

#### PNEUMATIC PRODUCTS

RODLESS CYLINDERS: *Band Cylinders, Cable Cylinders, MAGNETICALLY COUPLED CYLINDERS/SLIDES; GUIDED ROD CYLINDER SLIDES*
